

BISHOY EHAB

Computer Science Student | AI & NLP Engineer | Open Source Contributor
Cairo, Egypt | +201277083239 | beshoyehabhhmm@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Motivated 3rd-year Computer Science student at Ain Shams University (GPA 3.1), Scientific Computing track. Passionate about Arabic NLP, agentic AI systems, and developer tooling. Ships production-quality CLI tools and AI-powered pipelines. Active open-source contributor focused on building things that work.

EDUCATION

Bachelor of Computer Science — Scientific Computing Track

Expected 2027

Ain Shams University, FCIS | GPA: 3.1 | 3rd Year

Coursework: Data Structures, Algorithms, OOP, Database Systems, Machine Learning, Computer Networking, Computer Graphics

EXPERIENCE

Back-End AI Engineer Intern

Jun 2026 – Present

FlyRank | Remote

- Building AI-powered back-end services focused on NLP and agentic workflows.
- Integrating multi-provider LLM APIs (Groq, Gemini, OpenRouter) into production pipelines.

Vice Head, Resonance Committee

2025 – Present

Microsoft Student Partners – Ain Shams University (MSP-ASU)

- Lead committee operations and coordinate technical workshops and community events on campus.

Participant — NASA Space Apps Challenge

2024 & 2025

Cairo & Obour locations

- Competed twice in the global 48-hour hackathon, solving real-world problems with space data in cross-functional teams.

PROJECTS

dot-man — Dotfiles Manager CLI / TUI

2024 – Present

Python, Click, Textual, Git, GitHub Actions | github.com/BeshoyEhab/dot-man | Published to PyPI as dotman-git

- Git-powered branching dotfile manager: each config (work, personal, server) is a branch — one command to save, switch, and deploy.
- Features secret detection & auto-redaction, dry-run mode, pre/post deploy hooks, remote sync, interactive TUI dashboard, and shell completions (Bash/Zsh/Fish).
- Published to PyPI (dotman-git); CI/CD via GitHub Actions; 90+ commits, 5 releases.

pro-mgr — Multi-Project CLI Manager

2024 – Present

Python, Click, Textual, SQLite, Watchdog, TOML | github.com/BeshoyEhab/pro-mgr

- CLI/TUI tool for running tasks across multiple projects from any directory — no manual folder navigation or venv switching.
- Features watch-mode auto-rerun, task dependency chains with cycle detection, venv auto-activation, and shared pip caching.
- Integrates natively with dot-man for automatic dotfile branch switching per project context.

TimePlan — AI-Powered Study Roadmap Planner

2024

React 19, Vite, Tailwind CSS, Google Gemini AI, Netlify | ai-roadmap-planner.netlify.app

- Full-stack web app using Gemini AI to generate personalized phase-based learning roadmaps with milestone tracking and real-time progress visualization.
- Multi-format export (Markdown, PDF, JSON, HTML), dark/light theming, client-side persistence — no backend required.

FastWriterPro — Cross-Platform Desktop Writing App

2024

C++, Qt Framework | github.com/BeshoyEhab/FastWriterPro

- Cross-platform desktop app (Windows & Linux) with 30% runtime efficiency improvement via OOP design and code optimization.

Machine Learning Classification Model

2024

Python, Scikit-learn, Pandas, NumPy | Team project

- Collaborated on a data classification model achieving 95% accuracy through rigorous preprocessing, EDA, and algorithm fine-tuning.

Open Source Contributions

2024

end-4/hyprland-dots (Arch Linux)

- Contributed optimized dotfile & package synchronization logic to end-4/hyprland-dots, a widely-used Arch Linux configuration repository.

TECHNICAL SKILLS

Languages: Python (Advanced), Bash, C++, Java, SQL, JavaScript

AI & NLP: LangGraph, HuggingFace Transformers, Groq/Gemini API, ChromaDB, BM25, spaCy, Scikit-learn, NumPy, Pandas

Backend: FastAPI, REST APIs, SQLite, PostgreSQL, Ollama, Git, GitHub Actions (CI/CD)

Dev Tools: Click, Textual TUI, React, Vite, Qt Framework

Systems: Arch Linux, Hyprland, Fish Shell, Neovim, System Automation, Package Management

CERTIFICATIONS

- Natural Language Processing in Python Track — DataCamp (20 hrs, Feb 2026)
- Introduction to Deep Learning with PyTorch — DataCamp (Feb 2026)
- NLP with spaCy, Sentiment Analysis in Python, Feature Engineering for NLP — DataCamp (Feb 2026)
- Data Manipulation with pandas — DataCamp (Feb 2026)
- Linux Systems Training — System Administration Proficiency (Jul 2024)

LANGUAGES

Arabic: Native

English: Intermediate — Professional working proficiency
